

1142RX Series - Radio Nurse Call System

1142RX - Master Display Panel

Receives calls & alerts from 50 zones/call buttons, with the call location displayed on the alphanumeric digital display.

Patient calls to the 1142RX display panel will respond by showing the room/user name and a low level tone will be sounded. Staff panic calls will start a high level sounder.

Size (mm) 195 L x 151 W x 48 D

The 1142RX radio nurse call system is the ideal system for smaller Nursing & Residential Homes. It is simple to install for a competent DIY person or electrical contractor.

System Overview: The CAUK 1142 series system is completely "Open ended" in as much as it can accommodate future changes in specification, expansion and new monitoring facilities. This system can be programmed to be either a 'cancel at source' or 'cancel at panel' system. The 1142RX can receive two types of calls, either a "Call Nurse" or "Call Staff" (Panic).

The 1142RX requires mains power via either our:

12V power supply unit **P/No. A3684**

or

12 Volt PSU with standby battery **P/No. A1871**

Wall mounted units will require a **P/No. A2752** stainless steel bracket.

P/No. A5323

1150 - Nurse/Assist Button Standard Unit

1150 standard unit is a battery powered unit. It is supplied with a pull cord and triangle. The internal reassurance lamp confirms that a call has been sent.

An optional flexible socket for a wired pear switch is available.

Size (mm) 85 L x 85 W x 22 D

With Phono Socket **P/No. A5519**

Without Phono Socket **P/No. A5527**

Battery CR123A **P/No. A3425**

1142RX Series - Radio Nurse Call System

1150 - WC Call/Reset Unit

This WC call unit is a battery powered. It is supplied with a pull cord and triangle. The internal reassurance lamp confirms that a call has been sent.

Size (mm) 85 L x 85 W x 22 D

1123 - Wired/Radio Call/Reset Unit

The 1123 radio transceiver wall unit can be fitted to toilets or other areas where the disabled are at risk.

All versions are powered by a separate 12V power supply unit which plugs into a 240 Volt wall socket/fuse spur.

This versatile unit can also act as a transceiver, allowing it to receive calls from a nearby 1122 portable panic button (PPB). The 1123 will then transmit to and alert the master panel, which then displays the 1123 locations and ID of the activated 1122 PPB.

This unit can also be connected to wired accessories such as our 1110 wired over door lamp and 1114 wired ceiling mounted pull switch. The internal reassurance lamp confirms that a call has been sent.

1142RX Series - Radio Nurse Call System

1124 - Radio Ceiling Mounted Pull Switch

The ceiling mounted pull switch is battery powered. The lens is unclipped to access the battery.

The internal reassurance lamp confirms that a call has been sent.

Available with either a clear or red lens.

Size (mm) 86 L x 86 W x 60 D

Red Lens

P/No. A4977

Clear Lens

P/No. A4976

CR123A Battery

P/No. A3425

1122 - Portable Radio Panic Button (PPB)

P/No. A4639

This small unit is suitable for staff working away from fixed panic buttons and clips onto a belt or pocket. The 1122 PPB is powered by 2 x AAA batteries and has a low battery alert function.

Size (mm) 95 L x 46 W x 25 D

1122P - Portable Belt Pull Radio Panic Button

P/No. A5436

For high security premises there is a leather belt strap version. The body of the unit is grabbed and pulled to activate a panic call.

The 1122P is powered by 2 x AAA batteries and benefits from the low battery alert function.

Size (mm) 95 L x 46 W x 25 D excl. strap

1142RX Series - Radio Nurse Call System

1115P - Pendant Nurse Call Button with Lanyard

P/No. A5437

This battery powered pendant button comes with a lanyard, so can be worn around the neck. The 1115P is powered by 1 x CR2032 battery.

Size (mm) 85 L x 48 W x 15 D

1115W - Nurse Call Wrist Strap Button

P/No. A5438

This battery powered nurse call button comes with an elasticated wrist strap with Velcro fastening. The 1115W is powered by 1 x CE2032 battery.

Size (mm) 70 L x 45 W x 20 D excl. strap.

1123R - Radio Signal Repeater & Transceiver

P/No. A5439

The 1123R is a mains powered unit and is used to extend radio signal coverage. It may also be required if radio 'black spots' are a problem due to building structure or location of the transmitters/receivers.

The 1123 requires mains power via either our

12V power supply unit

P/No. A3684

or

12 Volt PSU with standby battery

P/No. A1871

Size (mm) 220 L x 140 W x 40D
